## OBJECTIVE

---

To fully utilize my professional experience as a WEB DEVELOPER/SOFTWARE ENGINEER in an environment where human resource potential is valued and recognized through continuous development and growth.

## HIGHLIGHTS OF QUALIFICATIONS

---

With 20 years of experience in developing software in full-stack solutions that include AngularJS, Angular, React, .NET Core C#, SQL and cloud-native technologies. Proven track record of owning features end-to-end — from shaping requirements with stakeholders through to delivery and release. Experienced in AI-assisted development using Claude Code, GitHub Copilot, and Cursor to accelerate delivery without compromising quality.

## PROFESSIONAL EXPERIENCES

---

### **HRR – Software Developer & Systems Integrations Specialist** (WFH) May 18, 2026 – Present

- Owns features end-to-end for a construction & home services client — from requirement shaping with stakeholders through implementation, testing, and deployment — working independently across the full stack (Next.js / React / TypeScript frontend, PostgreSQL backend, Convex BaaS, Railway / Vercel infrastructure).
- Uses Claude Code as primary AI coding agent to drive delivery velocity: integrates LLMs (Anthropic Claude, Google Gemini) for data extraction, classification, and grounded web lookup; builds end-to-end workflow automation via n8n, Playwright, Drive / Sheets APIs, and cron — validating all AI output and handling edge cases to maintain code quality.
- Proactively identifies and manages cross-system dependencies, flags risks early, and iterates rapidly based on stakeholder feedback, keeping work sliced into reviewable increments.

### **Projects (Construction & Home Services):**

- o Company website (*ReactJS, Next.js, Convex/n8n, Clerk, Google Gemini*) — Public marketing site. Owned planning, build, and deployment with zero handoff gaps.
- o Xactimate/Estimate Workflow (*ReactJS, Next.js, Convex, Clerk, Google Gemini, Railway PostgreSQL*) — Insurance estimate workflow; shaped ambiguous requirements into a clear, testable implementation plan.
- o Referral Partner Database Builder (*ReactJS, Next.js, Convex, Clerk, Google Gemini, Railway PostgreSQL, Google Places, Playwright*) — Internal tool that builds and maintains a deduplicated, contact-ready list. Included E2E Playwright automation and LLM-powered deduplication logic.

### **Ezerec – Senior Software Developer** (Hybrid) April 1, 2023 – March 31, 2026

- Developed and maintained high-performance web applications using React 17.0.2, React Native, .NET Core (C#) MVC and MS SQL, leveraging AI-driven tools (Cursor, GitHub Copilot) to accelerate coding speed and efficiency while maintaining test coverage and code quality.
- Collaborated directly with product and stakeholders to clarify requirements, break work into vertical slices, and deliver working software iteratively through agile sprints.

### **Project (Travel Industry):**

- o Enterprise Management System (*ReactJS, .Net Core MVC, MS SQL*) — Travel agent management platform.

### **Cloudstaff – Senior Software Engineer** (WFH) November 2, 2020 – June 2, 2023

- Conducted technical analysis of proposed solution designs.
- Committed code changes to enhance software according to user requirements.
- Adhered to development processes and coding standards.
- Tech Stack: Angular 4/9/12/13/14, .NET Core C#, MVC, MS SQL, MongoDB, Docker, RabbitMQ, and integrated external cloud services (Google Cloud Platform, HubSpot, PingIdentity).

**Projects (Finance Industry):**

- o MortgageChoice (*Angular 13, .Net Core MVC, MS SQL, GCP, HubSpot, PingIdentity*) — Brokerage Management system
- o CustomerData.Contact (*Cloud-native .NET Core microservices on GCP, Cloud Functions, Datastore, Pub/Sub*) — Event-driven customer master data and CRM synchronization
- o Tardis Omniverse (*Angular 13, ASP.NET Core/C#, REST APIs, MongoDB, RabbitMQ, Docker; Azure: Container Instances, Application Gateway, Container Registry, ARM/Bicep deployments*) — Lead generating software

**Ezerec – Senior Software Developer – Team Lead** (On-site) Feb. 1, 2017 – Oct. 30, 2020

- Led ERP web app team of developers end-to-end: from decomposing features into 1–2 day vertical slices and planning agile sprints with stakeholders, through implementation, peer review, and production release.
- Drove migration of legacy systems to a modern tech stack (Angular / React / .NET Core / MS SQL), managing cross-team dependencies and flagging risks proactively to minimize rework.
- Established coding standards, enforced them through peer reviews, and embedded TDD and unit testing as team norms.
- Trained the team in best coding practices and agile methodologies.

**Projects (Travel Industry):**

- o Content Management System (*AngularJS, .Net MVC, MS SQL*) — Travel agent software
- o Enterprise Management System (*ReactJS, .Net MVC/Core, MS SQL*) — Travel agent management software

**Cloudstaff – Senior Software Engineer** (On-site) Nov. 2015 – Jan. 31, 2017

- Developed internet banking applications using ASP.NET C#, WCF, and MS SQL.
- Contributed to a credit card management system using RESTful APIs, WCF, EF6, and IoC/DI patterns.
- Designed database schemas, stored procedures, and views using MS SQL.
- Applied agile practices with a focus on unit testing.

**Project (Finance Industry):**

- o Rubik (*.Net Core MVC, WCF, SQL*) — Banking Management system

**Indigo Web – Back/Front-End Web Developer** (WFH) June 22, 2009 – August 27, 2015

- Developed full-stack CMS, e-commerce, and web applications using ASP.NET C#/VB.NET, MVC, Umbraco, and MS SQL.
- Managed an AngularJS-based project management app used internally by the team.
- Implemented basic SEO features; built responsive front-end designs using Bootstrap.

**Project:**

- o Content Management System (Umbraco, C# MVC, MS SQL)

**First Call Computing – Web Applications Developer** (WFH) June 16, 2009 – July 25, 2011

- Developed web applications using ASP Classic, JavaScript, and MS SQL with stored procedures and Flash integration.
- Ensured cross-browser compatibility across all developed pages.

**Think Innovations – Web Designer/Developer** (WFH) June 22, 2009 – April 29, 2011

- Developed web and intranet applications using ASP.NET C#, Telerik controls, ORM, and MS SQL.
- Built a document management system with structured content, search, PDF export, and user-managed data.

**Team Power International – Senior Web Developer** (Dubai) August 31, 2007 – April 3, 2009

- Maintained and enhanced an e-commerce website including fixing payment gateway issues (ASP.NET C#, XML, MS SQL).
- Developed a chat application and a training management system using ASP.NET C# and MS SQL.

**Project:**

- o eCommerce Software (AspDotNetStorefront, ASP.Net C#, MS SQL)

**CompuEx – Software Engineer** (Bahrain) July 11, 2006 – June 21, 2007

- Developed and maintained ERP systems (accounting, HR, purchasing) using VB6, Crystal Reports, and MS SQL.
- Built a database migration tool to transfer data from SQL, Access, FoxPro, and Excel into MS SQL.

**Project:**

- o Enterprise Accounting and HR Management System (VB 6.0, MS SQL, Crystal Reports)

**Amertron Incorporated – Software Programmer** (On-site) Feb. 27, 2006 – July 10, 2006

- Maintained and enhanced ERP systems including lot tracking, accounting, warehouse, HR, and purchasing.
- Customized a browser-based lot tracking system using ASP.NET C#.

**Enigma Technologies – Software Programmer** (On-site) Jan. 3, 2005 – Feb. 21, 2006

- Developed a web-based Locator app and Express Medic (patient records & scheduling) using VB.NET, ASP.NET, and SQL Server.
- Customized and enhanced POS software using VB6 and Crystal Reports.

---

**EDUCATION**

---

**Bachelor of Science in Electronics and Communications Engineering**

HOLY ANGEL UNIVERSITY, Angeles City, Philippines • 1993 – 1998

Self-financed 90% of college expenses

---

**LICENSURE EXAM TAKEN**

---

November 4–5, 1998. Electronics and Communications Engineer Licensure Examination – Professional Regulations Commission (PRC), Manila, Philippines

License Number: 0017233
